

# Firewall Rules

The following firewall rules are applied to the VMs:

| <b>Richtung</b> | <b>Port</b> | <b>Dienst</b>                 |
|-----------------|-------------|-------------------------------|
| Inbound         | TCP 23      | Telnet                        |
| Inbound         | TCP 25      | SMTP                          |
| Inbound         | UDP 69      | TFTP                          |
| Inbound         | TCP 135     | Microsoft RPC Endpoint Mapper |
| Inbound         | TCP 136     | -                             |
| Inbound         | UDP 137     | NetBIOS Name Service          |
| Inbound         | UDP 138     | NetBIOS Datagram Service      |
| Inbound         | TCP 139     | NetBIOS Session Service       |
| Inbound         | TCP 445     | SMB / CIFS                    |
| Inbound         | UDP 1900    | SSDP / UPnP                   |
| Inbound         | UDP 11211   | Memcached                     |
| Outbound        | TCP 25      | SMTP                          |
